Night Cloud

HELP SUPPORT

Created by Sleepy Triangle

Sleepy Triangle
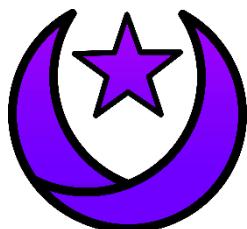

What is the goal of *Night Cloud*?

The goal of Night Cloud is to help you with documenting Your dreams. It's way easier to open up a computer after You wake up, than to reach for a notebook. To write your dream down, just hover the mouse over the date and press **Edit**.

What are lucid points?

Lucid points are great at counting Your how many lucid dreams you have ever had. After you wake up and realise you had a lucid dream, you can press the icon in the bottom-right corner to increase the numer by 1. The numer represents Your total amount of lucid dreams so far. To change it, either click the icon or press the number next to it and edit it manually.
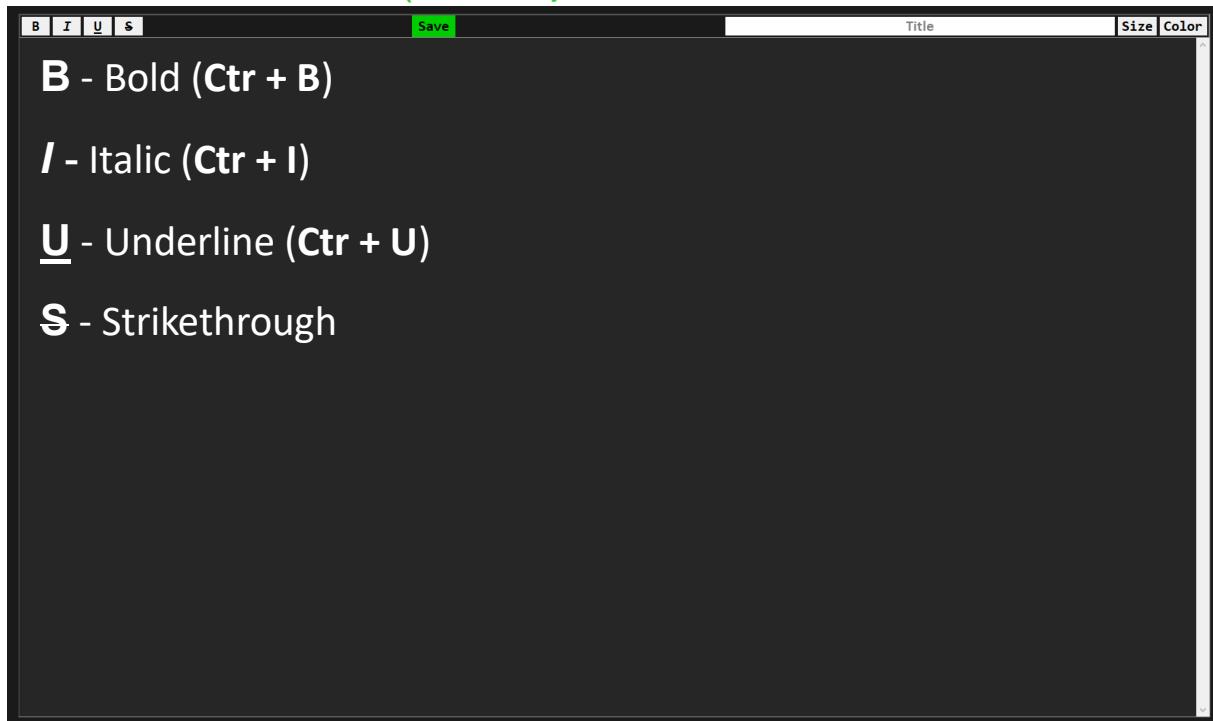

How to use the text editor?

Save (**Ctr + S**)

B - Bold (**Ctr + B**)

I - Italic (**Ctr + I**)

<u>U</u> - Underline (**Ctr + U**)

~~S~~ - Strikethrough

- To use the tools on the **left side** of the editor, select the text you want to modify and press the corresponding button or use a shortcut.
- To save the file press the *Save* button in the midle.
- To change the title press the *Title* frame and type Your new title.
- The *Size* button <u>always</u> affects the entire file. In addition, this button affects every file you open.
- When no text is selected, the *Color* button changes the color of the entire text. If something is selected, it changes only that part.
